in the spotlight

Contingency Operations & Vocational Engineer Review Training (COVER Train) Version 1.0 Issued: COVER Train version 1.0 is in the mail to unit education and training managers around the world. This training delivery and management system will put the trainee at the center point of the training cycle, while delivering a stand alone, one-stop shopping platform for individualized training. This first release of this innovative tool contains five Air Force Specialty Codes (AFSCs) -- electrical, pavements, structural, utilities and heating ventilation and air conditioning. The remaining civil engineer AFSCs will be incorporated into the next version. COVER Train will be used as a stand-alone product until web certification is received. We met with HQ USAF/SC representatives in Wash DC 9 Aug 01 to discuss web certification and Air Force portal issues. Coordination has begun to secure the certificate of net worthiness, which will eventually be required to accompany COVER Train and other civil engineer training software. We also demonstrated COVER Train to Air Staff logistics and maintenance managers

Competitive Sourcing Support

Program Focus: Provides competitive sourcing expertise and A-76 Help Desk s to Air Staff, MAJCOM CE Staff and base level civil engineers. Competitive Sourcir determination to source a function (in-house or contract) with the most efficient and effective method. The determination process is through competition that includes th private or public sector. The process typically used to make this determination is th federally mandated process outlined in the Office of Management and Budget (OM Circular A-76, Performance of Commercial Activities. The government retains cont responsibility for the function either through a service contract or in-house performa

To support this program the A-76 Help Desk provides on-call technical response to
